

Jeblio Corporation

Cyber Security Internship

Security & Ethical Hacking Program

Cyber Security Internship Syllabus

Outcome

Learn to secure, analyze, and test real-world systems against cyber threats.

Days 1–5: Basics

Day 1: Introduction to Cyber Security

Day 2: Types of Cyber Attacks

Day 3: Networking Basics (TCP/IP, DNS)

Day 4: Operating System Security (Linux/Windows)

Day 5: Security Principles (CIA Triad)

Days 6–10: Core Security

Day 6: Cryptography Basics

Day 7: Authentication & Authorization

Day 8: Firewalls & IDS/IPS

Day 9: Network Security

Day 10: Web Security Basics

Days 11–15: Ethical Hacking

Day 11: Footprinting & Reconnaissance

Day 12: Scanning Networks

Day 13: Vulnerability Analysis

Day 14: System Hacking Concepts

Day 15: Social Engineering

Days 16–20: Advanced Security

Day 16: Penetration Testing

Day 17: Malware Analysis

Day 18: Secure Coding Practices

Day 19: Cloud Security

Day 20: Incident Response

Days 21–25: Project

Day 21–23: Perform Security Testing on App

Day 24: Generate Security Report

Day 25: Final Presentation & Demo

Certification

Receive an official certificate after successful completion.
